Assessment Overview

Assessment encompasses the collection and evaluation of evidence regarding a student's learning. It plays a crucial role in teaching and learning, serving multiple purposes. Effective assessment can boost student engagement and motivation, especially when it encourages interaction among teachers, peers, and various resources.

Assessment provides valuable opportunities for teachers to gather evidence of student achievement relative to defined outcomes. It allows students to showcase their knowledge and skills, clarifies their understanding of concepts, promotes deeper learning, and confirms that their current understanding is a solid foundation for future learning.

New South Wales (NSW) syllabuses advocate for an integrated approach to teaching, learning, and assessment. The three key types of assessment are:

1. **Assessment for Learning**: This approach involves teachers using evidence about students' skills and understanding to guide their teaching. Often referred to as formative assessment, it typically occurs throughout the learning process to enhance clarity in student learning.
2. **Assessment as Learning**: In this approach, students take on the role of assessors of their own learning. They monitor their progress, ask reflective questions, and apply various strategies to evaluate what they know and how to leverage assessment for further learning.
3. **Assessment of Learning**, commonly referred to as summative assessment. This type of assessment is used to rank or grade students and typically occurs at key points in the learning cycle, such as the half Year and end of year, when students receive reports detailing their levels of skill, knowledge, and understanding achieved.

Both assessment for learning and assessment as learning share common elements, including self-assessment, peer assessment, and strategies that encourage students to actively monitor their own learning. Feedback, combined with evidence, helps teachers and students determine readiness for subsequent learning phases or identify areas requiring additional focus to strengthen knowledge, understanding, and skills.

It's important to note that not all tasks assigned to students will be assessment tasks. Students are expected to complete all assigned work, not just those designated for assessment.

Assessment Schedule Booklet and Time frames

This Assessment Booklet provides you with an assessment schedule for each of your subjects. Each assessment schedule lists for each task: type of task, ***approximate date*** (Term and Week), anticipated Areas of Learning to be assessed and weightings. At the conclusion of the subject assessment schedules in this Assessment Booklet is a Summary of Assessment Tasks – this will allow you to draw up your own diary of assessment tasks to assist you in managing and completing these tasks. If you have a problem with too many tasks scheduled at the one time, see your Year Adviser immediately.

Note that the dates listed in the assessment schedules and in the Summary of Assessment Tasks are APPROXIMATE.

Students will be informed by their teacher of the ACTUAL date and details of the assessment task at least TWO WEEKS before the task.

Note that the teacher notification has precedence over any information listed in the assessment schedules and Summary of Assessment Tasks contained in this Assessment Booklet – that is, details of assessment tasks listed in this Assessment Booklet (such as type of task, date of the task, Areas of Learning to be assessed, and weightings) may change from the date of issue of the booklet, so the notification given by the teacher will be used to list the correct details for each assessment task.

Attendance

Attendance at all timetabled classes is compulsory, especially on days when assessment tasks are being conducted or submitted.

Students must provide an authorised reason for any absence, accompanied by a written note from a parent or caregiver.

It is the student's responsibility to catch up on missed work and to ascertain if any assessment tasks were set during their absence. No automatic extensions are granted for students who are absent on the day the notice of a task is given.

Submission of Tasks

For assessment tasks completed outside the classroom:

- A Statement of Authenticity and Academic Integrity, issued upon notification of the task, must be signed by the student and submitted with the completed assessment task.
- Students must follow the school's guidelines for Acknowledging Sources in Assessment Tasks.
- All tasks need to be submitted by the designated date and time specified by the teacher.

Tasks submitted after the designated time will be considered LATE, unless exceptional circumstances apply. Late submissions will incur the following penalties:

- A note will be sent home, and a copy will be placed in the student's central file and provided to the Year Adviser and Deputy Principals.
- Students will lose 20% of their marks per day until the task is submitted, with a maximum loss of 100% after five days. For example, a task due on Thursday and submitted the following Monday will incur an 80% penalty.

All faculties need to maintain a record of submitted tasks. Tasks must be submitted in accordance with the instructions from the faculty.

Extensions to Due Dates or Special Consideration

Extensions for completing tasks may only be granted by the appropriate Head Teacher. Students must apply well before the due date and extensions will only be considered for severe illness or other exceptional circumstances. If an extension is not granted, the task must be submitted on the due date, even if incomplete. Late submissions without prior approval will incur mark deductions.

Prior Knowledge of Absence

Students who have a school-related scheduling conflict (e.g., zone athletics) on the day of an in-class assessment must inform the relevant teacher or Faculty Head Teacher in advance. If a student anticipates being absent on the submission date of a hand-in assignment, the student needs to submit the assignment before or on the due date, where possible. If this cannot happen then a parent note outlining reasons needs to be handed in to the classroom teacher or subject Head Teacher.

Absence Due to Illness/Misadventure and Submission of Tasks

Students are responsible for submitting all assessment tasks on time. Absence on the due date does not constitute valid grounds for an extension unless exceptional circumstances arise. Students should aim to complete tasks to the best of their ability and parents need to inform the school immediately if circumstances prevent them from doing so. If a student is absent on the day of an assessment task, the parent should inform the school in writing of the reason for the absence, submitting this written notification to both the classroom teacher and the Front Office at the earliest opportunity. It is also recommended to obtain a doctor's certificate for the day(s) absent.

If a student is absent, the Head Teacher may:

- Authorise completion of the assessment task or an alternative task upon the student's return.
- Grant an extension of time.
- Determine an alternative mode of assessment.

Performance in an alternative task may be reviewed by the Subject Head Teacher if it does not match the student's previous performance or if the task's difficulty is not comparable to the original.

Technology and Assessment Tasks

Students must ensure all work is backed up and take reasonable precautions against technology failure, as it is not a valid reason for late submission. Students should:

- Regularly back up work on external storage.
- Save work on the school server.
- Verify that their software is compatible with school technology.

All electronic submissions must be checked in advance to ensure accessibility. Hard copies should ideally be printed at home to avoid last-minute issues. No mobile phones or technological devices are permitted during in-class assessments or major examinations.

Oral Tasks

Oral tasks usually comprise a written submission and an oral presentation. Written submissions must be handed in on time, and late submissions will incur penalties at the rate of 20% per day. Students must be present for their oral presentation on the designated day. If absent, they will be marked LATE unless exceptional circumstances apply.

Zero Marks

A ZERO mark may be awarded when a student:

- Submits a task more than five days late without a valid reason.
- Does not attempt a task (non-attempt).
- Does not make a serious attempt at a task.
- Engages in serious malpractice.

Parents/guardians will be informed in writing, and the notification will be placed in the student's central file.

Malpractice in Assessment Tasks

Each student's mark will reflect their own work. All sources must be acknowledged in accordance with the school's guidelines. Malpractice, including plagiarism, will not be tolerated and can lead to a ZERO mark. Examples of malpractice include:

- Cheating or assisting others to cheat.
- Copying or using materials without appropriate acknowledgment.
- Submitting work with significant contributions from others.
- In possession of a mobile phone or smart watch during a test

Students suspected of malpractice may be required to provide evidence of their own work.

Plagiarism

Plagiarism is a form of **malpractice** or **cheating**.

Plagiarism is presenting another person's work as your own work by copying or reproducing it without acknowledgement of its source.

Plagiarism includes, but is not limited to:

- substantial parts of your presented or submitted assessment task has been copied from the work of someone else
- your assessment task contains a substantial body of copied material (including from the internet) without acknowledgement of the source through correct referencing
- engaging another person to produce or conduct research for your assessment task.

Plagiarism is seldom an issue when students properly acknowledge the source of the material. When completing an assessment task outside the classroom, to avoid the risk of plagiarism, students need to do two things – use in-text references and complete a Reference List.

Students found to be guilty of plagiarism in an assessment task could receive **ZERO marks** for the task.

Feedback

Feedback on assessment tasks will typically be provided within 2 school weeks after the task/assessment period is completed. Teachers will offer feedback during a nominated lesson, or across several lessons for more complex tasks.

Generally during feedback sessions, students are not allowed to have any writing apparatus on their persons.

Any queries related to marks must be raised with the teacher during that nominated feedback lesson, where the teacher will record the student's specific query, collect the paper and investigate the matter. A mathematical error can be addressed by the teacher in that lesson.
For queries related to marking, once all feedback lessons have been completed, the teacher(s) will review the queries without student presence, unless there are exceptional circumstances. The resolution of the query will be noted on the front page of the assessment task and there is the possibility that your mark could be adjusted either up, no change or down to ensure consistency with the marking criteria. No further correspondence or additional queries will be accepted after this feedback process. Once all queries have been finalised, student sign-off of mark accuracy will occur.
If a student is absent on the day of the feedback, the teacher may choose to schedule an additional feedback session. There is no expectation for a teacher to give you detailed 1:1 feedback. If the student has a query as to the marking, it must be raised during this session.
With extended response answers some faculties also use check marking, common script marking or double marking to provide consistency. These responses are generally not open to queries.

Artificial Intelligence

Using AI to complete assessment tasks may breach academic honesty and constitute malpractice. Students should produce original work to demonstrate their understanding and skills. Any work generated by AI may be considered plagiarism, potentially resulting in a ZERO mark.

Disputes Regarding Assessment Tasks

Students have the right to discuss marks awarded in a task with their class teacher. If dissatisfied with the response, they should consult the Head Teacher on the day the task is returned.

Disability Provisions

Girraween High School adheres to NESA guidelines regarding Disability Provisions. Students with documented disabilities may apply for reasonable adjustments in assessments. Applications should be directed to the Deputy Principal.

Identification of Students with Disabilities

Students with diagnosed disabilities must provide documentation from a relevant professional. School counsellors may recommend students for Disability Provisions, which will be assessed by the Deputy Principal.

Disability Provisions and Modifications

Reasonable adjustments such as small group supervision, rest breaks, or specialised equipment will be provided as needed based on documentation.

Acknowledging Sources in Assessment Tasks

Referencing

Referencing is a method of acknowledging the variety of sources of information and ideas that you have used while completing assessment tasks outside the classroom. Its purpose is to acknowledge the original source of ideas and work that is not your own. Direct quotations, facts and figures, as well as ideas and theories, from both published and unpublished works, must be referenced. Referencing is necessary to avoid plagiarism, to verify quotations and paraphrasing, and to enable readers (and markers) to follow up and read more fully the cited author's work.

Information that you are required to reference includes:

- quotations (exact words), or paraphrasing (information rewritten in your own words)
- ideas, arguments or specific information (such as statistics) proposed and developed by someone else.

The following types of sources do not need to be acknowledged:

- your own experiences or experimental results
- your original ideas, arguments or compositions
- common knowledge.

Common knowledge includes:

- facts that are commonly known (such as there are 12 months in a year)

- statements of facts that are easily available in a number of different kinds of sources (such as World War II began in 1939).

Referencing generally has two key elements:

❶ an in-text reference (that is, within the text of the assessment task) that indicates you have used a phrase, idea or concept from someone else

❷ a complete Reference List at the end of the assessment task giving full details of all sources referred to in the assessment task.

There are many referencing systems available. At Girraween High School, the **Harvard Style** of referencing is to be used when completing assessment tasks outside the classroom. If an assessment task is not referenced in the required format, you may be suspected of plagiarism.
All work presented in assessment tasks must be a student's own or must be acknowledged appropriately. Malpractice, including plagiarism, could lead to students receiving **ZERO marks** for that task.

Harvard Style Referencing Guide

In-text References

If you directly quote an author, discuss their ideas, research or paraphrase their text in your assessment task, you must provide an in-text reference (that is, within the text of your task) acknowledging their name, the year of publication, e.g. (Smith & Jones 2016)

You must then list all the references cited in your task, with full bibliographic details in alphabetical order, in your Reference List at the end of your task.

Quote

If you include a direct quote (word-for-word), the in-text citation must include the page number/s where the quotation appeared, e.g. … "correct referencing is a necessity" (Smith & Jones 2016, p. 16). Page numbers are also required when paraphrasing specific information.

When 30 or more words are quoted, quotation marks are NOT used. Instead, begin quoting the material on a new line and indent the text 5 spaces (use the Indent tool to keep all lines of the quote evenly indented) and include specific page number(s) in your in-text reference.

Paraphrase

This is where you use someone else's ideas, information, theories etc, but rewrite it in your own words. Note that no quotation marks are used here.

Example: *"*Satellites can be out into orbit around the Earth, the orbital velocity depends on the altitude above the Earth's surface." In other words, orbital velocity depends on the radius of orbit. (Warren 2008, p. 17)

Note

- When no author is available, cite the work by its title in both its in-text citation, e.g. (Smith 2009), and in the reference list. In the reference list, ignore articles such as "A", "An", and "The" when alphabetising by title.
- When no publication date is available, use n.d. (no date) in the place of the year, e.g. Smith (n.d.) notes that …
- If a DOI (Digital Object Identifier) is available for your source, place it at the end of the reference as shown in the journal article example below.

Creating a Reference List

Your references must appear at the end of your task in a new section entitled Reference List. The references listed are arranged alphabetically by author. Where a source has no author, it is cited by its title and ordered in the list alphabetically by the first significant word of the title. Start a new line for each reference.

A Reference List only includes material from sources such as books, journals and electronic sources, including the internet, which are cited <u>within</u> the assessment task.

For some courses, such as Stage 6 Society and Culture, a Bibliography may be required. A Bibliography is a list of relevant sources of all materials you read while preparing and writing your task, even if they were not all

referenced within the actual assessment task. Your teacher will inform you if a Bibliography is needed and the format to be used.

Individual Subjects

English Assessment Schedule Year 8 - 2026

Type and Description of Task	Mode(s)	Overall Weighting	Outcomes	Due Date
1. Indigenous Perspectives **Viewing and Film Analysis in Short Answer Responses (30%)** Under test conditions, students will view a selected scene from Rabbit Proof Fence and respond to questions in short responses.	Viewing and Representing Writing	30%	EN4-RVL-01 EN4-URB-01 EN4-ECA-01	**Term 1** **Week 10**
2. Close Study – A Midsummer Night's Dream **Part A – In class - Extended Response (20%)** Under test conditions, students will respond in essay form to a question. **Part B - Practical - (10%)** Part B could include a performance and/or a design project.	Reading Writing Representing	30%	EN4-RVL-01 EN4-URA-01 EN4-ECA-01	**Term 2** **Week 10**
3. Yearly Examination **Test Part A – Reading Task (20%)** This task will require short responses to unfamiliar texts **Part B – Presentation of a Speech (20%)** This will require students to deliver a speech in response to a question, instruction and/or stimulus relating to The Happiest Refugee. Students will be given time in class to prepare palm cards which will be used to deliver the speech.	Reading Writing Speaking	40%	EN4-RVL-01 EN4-URA-01 EN4-ECA-01	**Term 3** **Week 8/9**
		100%		

English Scope and Sequence Year 8 - 2026

Overview:

English 7–10 builds on the foundational skills developed in the earlier years to support the growing knowledge, understanding and skills in the areas of Reading, viewing and listening to texts, Understanding and responding to texts and Expressing ideas and composing text.

Term	Topic	Approximate Duration	Outline
1	Indigenous Perspectives – Poetry and Rabbit Proof Fence. Dir P. Noyce.	10 Weeks	Texts: Noyce, Rabbit Proof Fence (film). Selection of poetry. The English concepts explored in this unit include representation, codes and conventions, connotation, imagery, symbol, context and point of view.
2	Comedy – Midsummer Night's Dream. W Shakespeare.	10 Weeks	Text: Shakespeare, A Midsummer Night's Dream. Students will study the conventions of a Shakespearean Comedy. The English concepts of character, connotation, imagery and symbol.
3	Autobiography – The Happiest Refugee. A. Do	10 Weeks	Text: Anh Do, The Happiest Refugee. The English concepts explored through the study of this text include context, point of view, style, representation.
4	The Power of Storytelling - Stories in the Dark. D. Oswald.	10 Weeks	Text: Oswald, Stories in the Dark. In this unit of work we will explore the role of storytelling as a form of escapism. The English concepts to be explored include narrative, character, code and convention.

French Assessment Schedule **Year 8 - 2026**

Type and Description of Task	Skills	Overall Weighting	Outcomes	Due Date
1. Self-Introduction Poster Students create a hand-written poster about themselves	Creating Texts (Writing)	20%	ML4-CRT-01	**Term 1** **Week 6**
2. French dialogue Role Play Students will work in pairs to create and present a dialogue in French.	Interacting Speaking Writing	20%	ML4-INT-01 ML4-CRT-01	**Term 2** **Week 5**
3. Introductory Letter Letter writing Students will write a letter in French to a French-speaking penpal. In class task.	Creating Texts	20%	ML4-CRT-01	**Term 3** **Week 8**
4. Yearly Examination In class written paper Students listen to and read various texts in French and identify key information.	Understanding Listening Reading	30%	ML4-UND-01	**Term 4** **Week 3**
	100%	**100%**		

French Scope and Sequence Year 8 2026

Overview:

A student:

- Exchanges information and opinions in a range of familiar contexts by using culturally appropriate French language
- interprets and responds to information, opinions and ideas in texts to demonstrate understanding
- creates a range of texts for familiar communicative purposes by using culturally appropriate French language

Term	Topic	Approximate Duration	Outline
1	Introducing the Country and Self	10 weeks	French Around the World, Geography of France; School vocabulary Greetings, Forms of Address, Cultural Expressions, Gestures, Talking about self, Numbers to 31, Pronunciation; Cartoon Story: Tu habites où? Months
1	Describing Others My pets	10 weeks	Talking about others, descriptions, professions, Adjectives, Masculine and Feminine Genders, Days of the Week, numbers to 50 Pets in France and Australia, Shopping expressions, describing animals, Colours, Countries, Likes and dislikes, The verb etre
2	My Family	10 weeks	Family members, nationality, adjectives, Possessive Pronouns, Numbers to 70, the Alphabet, the verb avoir, Possessive *de*
3	Meal times	10 weeks	French customs and traditions, meal times food and drinks, Months of the year, Regular -er verbs, More possessive articles, Partitive Articles

HSIE Assessment Schedule Year 8 - 2026

Type and Description of Task	Overall Weighting	Outcomes	Due Date
Skills Test Students will complete an exam of their understanding of important skills and concepts.	20%	4-1, 4-2, 4-4, 4-8	**Term 1, Week 6**
Research Essay Students will research to complete an in-class essay.	25%	4-1, 4-2, 4-7, 4-8	**Term 2, Week 3**
Source Analysis Students will conduct a source analysis on a number of sources to develop historical arguments.	25%	4-5, 4-6. 4-8	**Term 3, Week 5**
Yearly Exam Students will complete a formal exam on their knowledge and understanding of the content. Students will complete a source analysis in the process.	30%	4-2, 4-3, 4-4, 4-6, 4-8, 4-9	**Term 4, Week 2**
	100%		

HSIE Scope and Sequence

Year 8 - 2026

Overview:

Stage 4 History introduces students to the foundations of historical inquiry, helping them develop skills in using sources, explaining change and significance, and understanding diverse cultures and time periods. Across the year, students investigate the ancient and medieval worlds building a broad understanding of how human societies have developed and interacted over time.

Term	Topic	Approximate Duration	Outline
1	Investigating the Ancient Past (including ancient Australia)	5 weeks	Students explore how historians and archaeologists investigate the past, including the Out of Africa Theory and the use of historical and scientific evidence. They analyse case studies, Aboriginal and Torres Strait Islander perspectives, and develop skills in source analysis, contestability and conservation.
1-2	The Mediterranean World (Egypt)	6 weeks	Students investigate key features of Ancient Egyptian society, including geography, beliefs, social structure and the power of pharaohs. Through archaeological and written sources and a depth study, they examine daily life, religion and political authority while developing historical inquiry skills.
2	The Asian World (China)	6 weeks	Students explore the political, social and cultural structures of Ancient China, including dynastic rule, beliefs and technological achievements. Students investigate significant individuals, inventions and events that shaped Chinese civilisation that builds understanding of how ancient Asian societies influenced the world.
2-3	The Western and Islamic World (Medieval Europe)	7 weeks	Students examine life in Medieval Europe, focusing on feudalism, the Church and the experiences of different social groups. They analyse developments such as the Crusades or the Black Death to understand cause and effect and interpret medieval sources.
3-4	Expanding Contacts (The Spanish Conquest of the Americas)	6 weeks	Students investigate Aztec society before European contact and examine the impact of Spanish conquest. Using a range of sources, they explore perspectives, conflict and the long-term consequences of colonisation.
4	The Asia-Pacific World (Japan under the Shoguns)	6 weeks	Students explore how Japan was shaped by shogunate rule, including social hierarchy, samurai culture and the influence of religion and tradition. They investigate daily life, political structures, Japan’s isolation, Tokugawa governance and analyse continuity and change while developing skills in source interpretation and historical significance.

Japanese Assessment Schedule **Year 8 -2026**

Type and Description of Task	Skills	Overall Weighting	Outcomes	Due Date
1. Reading and Writing Hiragana One written paper Reading: Students will read and recognise hiragana characters and words. Writing: Students will convert romaji and English words to hiragana script.	Understanding texts	20%	ML4-UND-01	**Term 1** **Week 8**
2. Japanese Dialogue Oral presentation and written script Students will work in pairs and present a dialogue in Japanese. The script will be submitted as their written task.	Interacting Creating texts	30%	ML4-INT-01 ML4-CRT-01	**Term 2,** **Week 4**
3. Poster Creation Infographic Students create a poster/PPT in Japanese on a topic studied in class.	Creating texts	20%	ML4-CRT-01 ML4-INT-01	**Term 3** **Week 4**
4. Yearly Examination One written paper Listening: Students will listen to various texts and answer questions in English. Reading: Students will read short texts in Japanese and respond in English.	Understanding texts	30%	ML4-UND-01	**Term 4.** **Week 2**
		100%		

Booklets, exercise book notes and hiragana skills will be checked as part of ongoing assessment.

Japanese Scope and Sequence Year 8 2026

Overview:

A student:

- Exchanges information and opinions in a range of familiar contexts by using culturally appropriate Japanese language
- interprets and responds to information, opinions and ideas in texts to demonstrate understanding
- creates a range of texts for familiar communicative purposes by using culturally appropriate Japanese language

Term	Topic	Approximate Duration	Outline
1	Hiragana & Self-introduction in Hiragana	10 weeks	Country and Culture: Introduction to Japan, impact of Japanese Culture Hiragana Script: Learning 46 Hiragana characters and special rules Self-Introduction: Greetings, Classroom Instructions, Names, How are you, Nationalities, Residence, Ages, Numbers
2	Personal World	10 weeks	Personal world: My family, My friends and pets, Family members, Asking how many people are in someone's family and responding, Telling who is in your family, Asking someone if they have any pets and responding, Describing pets and friends
3	Food & Festivals	10 weeks	Food and Drinks: Asking about likes and dislikes and responding, Expressing likes and dislikes, Asking the day and date and responding, Asking when an event will take place and responding Culture: Table manner, Festivals and Celebrations in Japan
4	Hobbies & Travel	10 weeks	Hobbies: Asking about hobbies and interests and responding, Asking about sports and responding, Talking about what someone can do and can't do Travel: Asking where someone is going and responding, Asking who someone is going with and responding, Asking how someone is getting there and responding

Korean Assessment Schedule **Year 8 -2026**

Task	Type and Description of Task	Skills	Overall Weighting	Outcomes	Due Date
1. Reading and Writing Hangul	One written paper Reading: Students will read and recognise Hangul characters and words. Writing: Students will convert romanisation words and sentences to Hangul script.	Understanding Texts	20%	ML4-UND-01	**Term 1, Week 8**
2. Korean Dialogue	Oral presentation and Written script Students will work in pairs and present a dialogue in Korean. The script will be submitted as their written task.	Interacting Creating Texts	20% 10%	ML4-INT-01 ML4-CRT-01	**Term 2, Week 4**
3. Poster Creation	Infographic Students create a poster/PPT in Korean on a topic studied in class.	Creating texts	20%	ML4-CRT-01 ML4-INT-01	**Term 3, Week 4**
4. Yearly Examination	One written paper Listening: Students will listen to various texts and answer questions in English. Reading: Students will read short texts in Korean and respond in English.	Understanding texts	30%	ML4-UND-01	**Term 4. Week 2**
			100%		

Korean Scope and Sequence Year 8 2026

Overview:
A student:

- Exchanges information and opinions in a range of familiar contexts by using culturally appropriate Korean language
- interprets and responds to information, opinions and ideas in texts to demonstrate understanding
- creates a range of texts for familiar communicative purposes by using culturally appropriate Korean language

Term	Topic	Approximate Duration	Outline
1	Korean Alphabet (Hangul) & Self Introduction	10 weeks	Country and Culture: Introduction to Korea, impact of Korean Culture Korean Script: Learning Hangul characters and special rules Self Introduction: Greetings, Classroom Instructions, Names, How are you, Ages, Numbers, Nationality, Sports, Likes and Dislikes
2	Personal World	10 weeks	Personal world: My family and My friends, Asking how many people are in someone's family and responding, Telling who is in your family, School life, School object
3	Hobbies & Routine	10 weeks	Hobbies: Name sport and leisure activities, Talk about likes and dislikes, Ask and say what sport you like, Talk about when an action happens, Suggest doing something together, Talk about where an action happens, Say you can/can't do something Routine: Tell the time, Use some words to express 'come and go', Say what time you do actions, Talk about daily routine, Link words or sentences
4	Food & Travel	10 weeks	Food: Food and drink items, Describing how food taste, Ordering food and drink, Ask about likes and dislikes, Ask and say which food someone ate Asking where someone is going and responding, Asking who someone is going with and responding, Asking how someone is getting there and responding Culture: Table manner, Festivals and Celebrations in Korean

Mathematics Assessment Schedule Year 8 - 2026

Type and Description of Task	Skills	Knowledge	Overall Weighting	Outcomes	Due Date
1. In Class test: 20 minute non - calculator test 50 minute test using calculators	5%	5%	10%	Number and Algebra Measurement and Geometry	**Term 1** **Week 6**
2. In Class test: 20 minute non - calculator test 50 minute test using calculators	5%	5%	10%	Number and Algebra Measurement and Geometry Statistics and Probability	**Term 2** **Week 4**
3. In Class test: 20 minute non - calculator test 50 minute test using calculators	17%	17%	34%	Number and Algebra Measurement and Geometry	**Term 3** **Week 6**
4. Yearly Examination: 90 minute test using calculators *(20 minute non - calculator test)*	23%	23%	46%	Number and Algebra Measurement and Geometry Statistics and Probability	**Term 4** **Week 2**
	50%	**50%**	**100%**		

Mathematics Scope and Sequence Year 8 - 2026

Overview: A student develops understanding and fluency in Mathematics through:

- exploring and connecting mathematical concepts
- choosing and applying mathematical techniques to solve problems
- communicating their thinking and reasoning coherently and clearly.

Term	Topic	Approximate Duration (Weeks)	Outline
1	Indices	3	Introduction to the index laws using numerical bases.
	Algebra techniques	3	Manipulating algebraic expressions including expanding brackets and factorisation, substitution in formulae.
	Irrational numbers and Pythagoras' Theorem	2	Defining irrational numbers and applying Pythagoras' Theorem to problems
	Length, Area & Volume	3	Area & perimeter of plane shapes including circles and volume of cylinders
2	Data classification & visualisation	2	Classifying data and drawing statistical graphs
	Data analysis	2	Data analysis including mean, median, mode, range and skewness
	Equations	2	Solving linear equations and quadratic equations of the form $ax^2 = c$
	Ratio & Rates	2	Solving problems involving ratios and rates
3	Graphing Linear Equations	3	Graphing linear functions of the form $y = mx + c$
	Angle relationships	1	Finding angles in diagrams involving angles at a point and parallel lines.
	Properties of geometrical figures	1	Review of angles in triangles and quadrilaterals
	Networks (enrichment)	1	Introduction to basic networks
	Review of consumer arithmetic	1	Review of profit, loss, GST, simple interest
	Congruent & similar triangles	2	Introduction to congruency and similarity tests
	Spreadsheets (enrichment)	1	Introduction to basic spreadsheeting
4	Numbers of any magnitude	2	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
	Area and surface area	3	Finds area, surface area and volume of shapes including prisms and pyramids
	Probability	2	Solves probability problems involving Venn diagrams, two-way tables and tree diagrams
	Indices	3	Applying index laws to pronumerals, including negative and fractional indices

Music Assessment Schedule Year 8 - 2026

Type and Description of Task	Performance	Composition	Listening	Overall Weighting	Outcomes	Due Date
1. Popular Music Performance task demonstrating technique and repertoire (several pieces) on guitar	25%			**25%**	MU4-PER-01	**Term 1 Week 8**
2. Popular Music- - Composition and performance task Students will arrange a popular song for small ensemble	10%	15%		**25%**	MU4-PER-01 MU4-COM-01	**Term 1 Weeks 9-10**
3. Hip-hop Composition Students will create an original hip-hop song and perform it.	10%	20%		**30%**	MU4-PER-01 MU4-COM-01	**Term 3 Week 8**
4. Yearly Test Students will undertake a written test involving listening examples from Popular and Hip-hop music.			20%	**20%**	MU4-LIS-01	**Term 4 Weeks 2-4**
	80%	20%		100%		

Music Scope and Sequence

Year 8 - 2026

Overview:

Students will experience music from several different cultures. They will sing and perform songs representing these cultures. Students will learn about the development of Rock and Pop music from the 1950s to the end of the 20th Century and they will compose a short Rock song.

Term	Topic	Approximate Duration	Outline
1	Music of Another Culture	12 weeks	Students will experience the music of Africa, Ireland, Japan, Bali and Australia, learning about vocal and dance music from these cultures. Students will compose a pentatonic melody for an instrument of their choice.
2	History of Rock & Pop Music	10 weeks	Beginning with the 1950's, we will study the origins of Rock Music and follow its history to 1999 and perform an existing Rock song.
3	History of Rock & Pop Music (Continued)	10 weeks	Students will continue to learn the history of Rock Music and work in small ensembles to compose a short Rock song on music software reflecting upon their knowledge of the history of Rock Music.
4	Music for Small Ensembles/ Class Performance	8 weeks	Small Ensemble performances will alternate with full class performance.

Personal Development, Health and Physical Education Assessment Schedule Year 8 - 2026

Type and Description of Task	Skills	Knowledge	Overall Weighting	Outcomes	Due Date
1. Practical Assessment 1 In this practical assessment, students participate in a Gymnastics unit where they develop and apply a range of basic and complex movement skills. Students work collaboratively in groups of 3–4 to choreograph and perform a 1-minute gymnastics routine set to music. The routine demonstrates skill selection, movement sequencing, control, teamwork, and safe performance practices.	15%	10%	25%	PD4 - 4 PD4 – 5 PD4 – 10 PD4- 11	**Semester 1 Continuous**
2. Health Task Cultural Pitch to be assessed in class in Semester 1.	15%	5%	20%	PD4 – 7 PD4 – 1 PD4 - 3	**Term 1 Week 6**
3. Practical Assessment 2 Practical assessment is ongoing and will be periodically assessed in relation to the sports that are being conducted throughout the semester.	15%	10%	25%	PD4 - 4 PD4 – 5 PD4 – 10 PD4- 11	**Semester 2 Continuous**
4. Health Examination Yearly Health Examination based on Semester 1 and 2 The examination evaluates comprehensive course content and learning outcomes, encompassing skills, knowledge and conceptual understanding. Topics include the entire year 8 curriculum.	15%	10%	25%	PD4 – 9 PD4 – 2	**Term 3 Week 8**
	60%	**40%**	**100%**		

Personal Development, Health and Physical Education (PDHPE) - Scope and Sequence

Year 8 - 2026

Overview:

The Year 8 PDHPE course focuses on key units such as Culture/ Relationships, First Aid, Discrimination and Health Consumerism. Students gain practical skills in first aid, learn to identify and respond to discrimination, and explore health consumerism. They also study the role of culture in shaping personal identity and interpersonal interactions. Through these units, students develop important life skills, promote respectful relationships, and build a deeper understanding of their health and wellbeing in both individual and community contexts.

Term	Topic	Approximate Duration	Outline
1	Culture / Relationships	10 weeks	Students involve themselves in a variety of theoretical and practical learning opportunities that delve into the impact and importance of culture / relationships with a specific focus on Aboriginal and Torres Strait Islanders.
2	First Aid	10 weeks	Students involve themselves in a variety of both theoretical and practical implementation of Basic First Aid principles and actions. These include but are not limited to DRSABCD, Stings and bites, bleeding, etc.
3	Discrimination	10 weeks	Students involve themselves in a variety of theoretical and practical learning opportunities that delve into the impact and importance of discrimination with a specific focus on Aboriginal and Torres Strait Islanders
4	Health Consumerism	10 weeks	Students involve themselves in a variety of theoretical and practical learning opportunities that delve into the impact and importance of Health Consumerism.

Science Assessment Schedule Year 8 - 2026

Type and Description of Task	Working Scientifically Skills	Knowledge and Understanding	Overall Weighting	Outcomes	Due Date
1. Working Scientifically Skills Task This task assesses students' achievement of the non-practical Working Scientifically Skills. This includes processing and analysing data and information, problem solving, and communicating scientifically.	20%	0%	20%	SC4-7WS – SC4-9WS	**Term 1, Week 9**
2. Half Yearly Examination This task is a formal written examination comprising objective response questions and questions that require students to write short and extended responses. The task assesses a broad range of course content and outcomes, including skills in working scientifically.	10%	15%	25%	SC4-7WS - SC4-9WS, SC4-13ES, SC4-16CW, SC4-17W	**Term 2, Week 5**
3. Practical Task This task assesses skills in working scientifically and a small amount of knowledge and understanding content. There will be a practical component to this task where students will have to conduct an experiment. Tasks could include analysing and processing data and information, planning and conducting practical investigations, and problem solving.	20%	5%	25%	SC4-5WS - SC4-9WS	**Term 3, Week 5**
4. Yearly Examination This task is a formal written examination comprising objective response questions and questions that require students to write short and extended responses. The task assesses a broad range of course content and outcomes, including skills in working scientifically.	10%	20%	30%	SC4-7WS - SC4-9WS, SC4-14LW, SC4-11PW	**Term 4, Week 1**
	60%	**40%**	**100%**		

Science Scope and Sequence

Year 8 - 2026

Overview:

Science answers questions about the world through evidence-based knowledge that is constantly updated and expanded. It is a collaborative and creative endeavour, resulting in a body of knowledge that explains phenomena in the natural world. Students learn about different areas of science and develop skills in experimentation, collaboration, data analysis, problem-solving, and scientific communication.

Term	Topic	Approximate Duration	Outline
1	Elements, Compounds and Mixtures	9 Weeks	Students explore physical and chemical changes, analyse matter behaviour in relation to particles, understand the connection between heat energy and particle movement, forecast the impact of heat changes on different states of matter, and explain how changes in physical properties during evaporation, condensation, boiling, melting, and freezing relate to heat energy. Students will observe these changes, recognize the presence or absence of substances, and study chemical changes like photosynthesis, respiration, and chemical weathering. They will also compare particle arrangement in physical and chemical changes and assess the reversibility of these processes.
2	Cells	8 Weeks	In this topic students learn that cells are the basic units of living things and have specialised structures and functions. They learn about types of cells, their structure, functions, and organisation in multicellular organisms. They also learn to use microscopes to observe a variety of cells and tissues.
2-3	Energy	7 Weeks	Students study energy in all forms, energy-efficient design, conservation, efficiency, objects with energy, heat energy transfer, energy transformation, science and technology developments increasing device efficiency, electricity as energy transferring in a circuit, and constructing and drawing simple circuits.
3-4	Body Systems	8 Weeks	Students learn about human body systems and their roles, including the respiratory, digestive, excretory, and musculoskeletal systems. They understand how these systems collaborate to provide cells with necessary gases, nutrients, and water, while also eliminating cell waste. Students identify respiration materials, analyse scientific evidence for resolving health concerns and real-world problems, and discuss the impact of technological advancements on contemporary issues, such as organ transplantation, artificial joints and limbs, and treatments for diseases like diabetes, asthma, kidney or heart disease.
4	Rocks and Minerals	5 Weeks	Students study Earth's structure, rock origins, fossil formation, interpretation of geological history in sedimentary layers, mineral content in rocks, classification of rocks and minerals, and mining in Australia.
4	Growth and Reproduction	3 Weeks	This topic covers students' prior knowledge of living things' characteristics, life cycle stages, and reproductive mechanisms. It also explores adaptations in Australian organisms. Students will conduct hands-on investigations to understand these concepts.

Technology Mandatory: Engineered Systems unit and Agriculture and Food Technologies Assessment Year 8 - 2026

Task	Type and Description of Task Note: Each class will complete both units of work. Some classes will complete Engineered Systems in Semester 1 and Agriculture and Food in Semester 2. Other classes will complete Agriculture and Food in Semester 1 and Engineered Systems in Semester 2.	Overall Weighting	Outcomes	Due Date
1 or 3 Load Shifter	**Engineered Systems: Semester 1 or 2. Duration of unit: 20 weeks** **Project A:** Load shifting device. Students will apply an engineering design process to design, construct, test and evaluate a device containing at least three different mechanisms that shifts a specified load a specified distance horizontally and vertically.	25%	TE4-1DP, TE4-2DP TE4-3DP	Semester 1 T2W4 Semester 2 T4W4
2 or 4 Project Report	**Engineered Systems** Students will create a detailed project report that documents various stages of design, production, testing and evaluation of the Engineered Systems project they have created, research a famous engineer, and investigate indigenous engineered systems and their impact on society and the environment.	20%	TE4-1DP, TE4-2DP TE4-8EN TE4-10TS	Semester 1 T2W4 Semester 2 T4W4
3 or 1 Agriculture and Food	**Agriculture and Food Technologies. Semester 1 or 2. Duration of unit: 20 weeks** **Agriculture:** students will grow a range of vegetable products on the school farm to be used as ingredients for food products that will be prepared in the school food technology learning space. **Food:** students will undertake a range of food preparation activities culminating in designing, making and evaluating a burger project.	30%	TE4-1DP, TE4-2DP TE4-3DP	Semester 1 T2W4 Semester 2 T4W4
4 or 2 Research Task and Presentation	**Agriculture and Food Technologies. Semester 1 or 2.** Students will research and create a presentation about the cultivation and processing of a food product, detail a recipe that their selected food product is used in, and explain the role of a person in the agriculture or food production industry and their impact on society.	15%	TE4-5AG TE4-6FO TE4-10TS	Semester 1 T2W4 Semester 2 T4W4
Yearly Exam	Students will be examined on content and outcomes from the Engineered Systems and Agriculture and Food units of work. One exam only in Term 4.	10%	Any of the above outcomes	Term 4 Week 2
		100%		

Technology Mandatory: Engineered Systems and Agriculture and Food Technologies Scope and Sequence Year 8 2026

Overview:

The **Engineered Systems** unit of work focuses on how force, energy and motion are used in engineered systems. Students have opportunities to experiment and develop prototypes to test solutions to engineering problems. They will produce functional practical solutions to a range of engineering problems.

The **Agriculture and Food Technologies** unit of work involves students learning about the processes of food and fibre production. Students develop knowledge and understanding about managed systems that produce food. Students learn about the characteristics and nutritional qualities of food. Students are provided with opportunities to design, plan and produce recipes and food products.

Topic	**Approximate Duration**	**Outline: Engineered Systems (Semester 1 or 2)**
Engineering Projects	20 Weeks	Students will develop practical solutions to engineering problems by generating innovative design ideas and communicating them through sketches, drawings, models, and prototypes. They will use tools, equipment, materials, and processes to produce products and systems, while investigating force, energy, and motion in engineered systems. Students will develop project management skills and apply safe work practices throughout all activities.
Project Report	8 Weeks To run concurrently with EDP1	Students will investigate and report on the role of an engineering professional and the impact of that person's work on society and the environment. They will explain how force energy and motion apply to an engineered system they have developed and document the design, development, production, testing and evaluation of an engineered system. They will also investigate indigenous engineered systems and their impact on society and the environment.
Yearly Exam	1 period	Students will be examined on various course outcomes in a formal exam situation. It will be relevant to the Engineered Systems and Agriculture and Food Technologies units of work.
Topic	**Approximate Duration**	**Outline: Agriculture and Food Technologies (Semester 1 or 2)**
Agriculture	10 weeks	Students will develop knowledge, understanding and practical experience in planting, growing and producing vegetable products in a managed environment. They will investigate and report on how particular food crops are grown commercially in Australia and study the role of someone in the Agricultural industry and their impact on society and the environment.
Food Technologies	10 Weeks	Students will plan, prepare, and produce food recipes safely and hygienically while developing knowledge of nutritional value and healthy lifestyles. They will learn to improve recipes for better nutrition, study food industry roles and their societal and environmental impacts, and design and produce a nutritious food product.
Yearly Exam	1 period	Students will be examined on various course outcomes in a formal exam situation. It will be relevant to the Agriculture and Food Technologies and Engineered Systems units of work.

Visual Arts Assessment Schedule Year 8 - 2026

Type of Task and Description	Practical	Art History Criticism	Overall Weighting	Outcomes	Due Date
Task 1: Artmaking & Art critical and historical studies - Research on and analysis of influencing sculpture-based artist and artwork. Visual Art diary including drawings of animal sculpture design and annotations.	10%	10%	20%	VA4-CHC-01	**Term 1** Week 5
Task 2: Artmaking Final sculptural artwork	30%		30%	VA4-AMC-01 VA4-AMV-01 VA4-AMP-01	**Term 2** Week 9
Task 3: Artmaking & Art critical and historical studies Comic book or storybook digitally imaged or hand- drawn work in progress including Book cover, three completed pages and reading.	30%		30%	VA4-AMC-01 VA4-AMV-01 VA4-AMP-01	**Term 3** Week 5
Task 4: Art critical and historical studies Written examination on course content: Art Viewpoints		20%	20%	VA4-CHC-01	**Term 4** Week 2
	70%	**30%**	**100%**		

Visual Arts Scope and Sequence Year 8 - 2026

Overview:

- Students will extend their understanding of the Elements of Art by exploring art principles and viewpoints in the visual arts in further depth through study of a key contemporary and modern artists.
- Students will build an understanding of the art concepts and artist's practice through extensive artmaking projects. They will continue to develop their ability to reflect on and interpret their artmaking actions and choices.

Term	Topic	Approximate Duration	Outline
1	Creative Creatures	10 weeks	Students explore artists that use fantasy and animals in their work to create a site-specific sculpture of a mythical animalistic creature to be installed in the school. Students will develop drawings of the sculpture and explore sculptural techniques including making a foundational frame from assemblage and paper-mâché/plaster.
2		11 weeks	Students will develop colour mixing skills using paint to develop tone and texture to develop expressive artworks. Students paint their sculptures using a variety of techniques and install these monsters in the school environment and school exhibition. Students will photograph their artworks within the school environment and use editing software to enhance these. Extension students create a series of hybrid animals using photoshop. Students will present their body of work including their sculpture, photographs, drawings and digital images.
3	Excelsior Comic or storybook	10 weeks	Students are to create a story board for an original comic book or children's book that relates to their life in some way. Student will investigate the work of an illustrator and research creators such as Stan Lee and Manga comics artists in their critical/historical studies. They will develop character profiles and studies on character expressions. They will write a storybook narrative or comic book for an audience of primary school students. Student may use digital and/or hand-drawn processes to create their illustrations.
4		9 weeks	Students are to create a comic book that relates to their life in some way and is suitable for a primary school aged audience. They can hand draw and or paint with mediums of choice or use digital programs and tablets to create their physical comic/story book. Books are to be published and copies displayed in the library and read to an audience. Students can use digital imaging and mixed media formats as an extension activity to further their skills in illustration.

Summary of Year 8 Assessment Tasks

Note that the dates listed in this summary are APPROXIMATE.

Students will be informed by their teacher of the ACTUAL date and details of the assessment task at least TWO WEEKS before the task.

Semester 1

Term 1

WEEK	
1B	
2A	
3B	
4A	
5B	Visual Arts
6A	French, HSIE, Mathematics
7B	
8A	Korean, Japanese, Music, PDHPE
